## About Me

A highly motivated and experienced Android Developer, currently looking for a job. Excellent multiple skills, as well as proficiency in minute-taking and extensive experience liaising with clients.

Able to quickly learn and adapt to new technologies.

Skilled at solving complex problems and finding optimized solutions.

The pleasure of being an Android Developer comes with the ability to use knowledge to create practical solutions for real-life problems and better understand the technology and the opportunities it presents.

## Experience

- **11.2013 - 04.2014 Vision Studio Local as Internship**
- **01.2015 – 05.2020 Gold Finger Studio**

Gold Finger Studio is based in my hometown, and it's my public company name for clients, as I mostly work on contract-based projects that I am getting on Fiver or Upwork. I have worked with Java, created native Android apps, and also used some of the most popular design patterns on some of my apps, also at Gold Finger, I have worked with some WordPress Sites manipulating Themes and Plugins. One of my biggest projects was Mini for Facebook, which reached over 1 Million Downloads on Play Store. All my self-created projects are listed below in the (My Work) section, you can view them online at the Play Store or GitHub.

- **08.2020 – 06.2021 - Instructor at Creative Hub**

Creative Hub is an Online Education Platform for technical subjects they are based in Prishtina and Skopje at Creative Hub I have worked as an online Instructor, because of the Covid situation we had, I needed to give lectures online using Google Meet and other streaming platforms like OBS, my main task was to give over 150 hours of tutorials for the students that were taking those courses. The courses that I was teaching were: *Android Development, Adobe Premiere Pro, Adobe Photoshop, and Adobe After Effect.*

- **12.2021 – 05.2022 - Senior Android Developer at Melon Tech**

Melon Tech is a software development company focused on building teams & delivering meaningful solutions. My job at that company is to work with different clients that are reaching Melon for Android Development. Currently, I am building projects for a Company called Turnpike, based in Sweden. I am challenging there myself with a lot of challenges for building and maintaining different projects for different devices like Wear OS or Android Tablets etc.

- **06.2022 - Senior Android Developer at GroupVery**

GroupVery is a tech company based in the UK, We help our clients build world-class digital solutions that take their business to the next level. We specialize in the Betting, Trading, and Fintech industries - working with technology-driven companies to support them with application development, software implementation, and systems integration.

Where especially I have worked in the trading industry with our partner [Logiciel Services](#), where I was developing a trading application from scratch in a huge team as the Android team leader, currently the project is ongoing so I cannot share a lot of info about it.

## Private Business

I have worked on a Home automation project, I created an android app for that project, the app should connect with a Local server and communicate using SQL Database to allow the user to turn on or off all electrical devices that would be connected to the hormone. The user, in the end, would have the ability to view all the devices in the 2D environment or a list mode and can manipulate all electrical devices in their homes.
